Pattambi, Kerala - 679533, India

PROFESSIONAL SUMMARY

Dynamic Full-Stack Developer with a proven track record of architecting and deploying cross-platform solutions. Transitioning from a solid academic foundation in Computer Science to leading technical operations, I specialize in building scalable mobile applications with Flutter and robust web platforms using React and Next.js. Experienced in managing end-to-end development lifecycles, from front-end UI/UX design to back-end integration, ensuring high-performance delivery for complex service-based ecosystems.

SKILLS

- Programming Languages
- REST APIs
- AI Tools
- Web/App Development
- Git
- Creativity
- Cloud Services
- Graphic Designing
- Flexibility
- Database Management
- Leadership
- Teamwork

EXPERIENCE

- **Web Development Intern** Jan 2022 - Feb 2022
StartKey Solutions Trissur, Kerala
 - Maintained core web services and wrote efficient code using best practices.
 - Collaborated with developers to learn and create a website, focusing on educational growth rather than client-facing projects.
- **Flutter Intern** Dec 2024 - Mar 2025
Karippal Innovations Trissur, Kerala
 - Collaborating on building and maintaining mobile applications, focusing on UI/UX design, feature implementation, and bug fixes for both new and existing projects.
 - Managing client requests, project timelines, and backend server integrations to ensure seamless app performance and client satisfaction.
- **Software Development Engineer** May 2025 - Present
Servespace Bangalore, Karnataka
 - Engineers scalable, cross-platform mobile applications using Flutter/Dart, strictly implementing Clean Architecture and modular design for enhanced code maintainability and feature velocity.
 - Orchestrates complex server integration, designing and implementing robust middleware logic to manage secure data synchronization and optimize RESTful API communication.
 - Manages the full application lifecycle, overseeing rigorous unit/widget testing, version control (Git), and the successful CI/CD releases to Web, Google Play and Apple App Stores.
 - Drives app stability and user engagement by resolving critical bugs and leveraging analytics tracking to inform feature prioritization and execute data-backed performance optimizations.

PROJECTS

- **Emergency Response Network: [Mini Project]** Jan 2024 - May 2024
 - Designed an App using Flutter, leveraging motion sensor data for accident detection and real-time signal transmission to nearest responders.
 - Demonstrated advanced database management skills while improving efficiency.
- **Automated Exam Paper Evaluation: [Main Project]** Aug 2024 - Apr 2025
 - Developed an AI-powered system to automate handwritten exam paper evaluation using OCR and NLP techniques for semantic answer assessment.
 - Implemented handwriting recognition using DTrOCR and integrated GPT-based models for accurate, context-aware grading and feedback generation.
- **EpiCare - Winning Peoject InApp** Jan 2025 - Jan 2025
 - Designed an advanced Epilepsy Prediction and Alerting System utilizing machine learning and signal processing to monitor EEG signals and predict seizures.

- Engineered a predictive alerting mechanism to provide early warnings to patients and caregivers, facilitating timely medical intervention and reducing health risks.
- **KisanX - Category Winner Techpulse** Feb 2025 - Feb 2025
 - Built an AI-driven smart farming application featuring a multilingual interface, weather-based crop recommendations, and a dedicated farmer-vendor marketplace.
 - Integrated AI-powered crop disease detection and an intelligent chatbot to deliver real-time agricultural guidance, policy updates, and improve urban farming yields.

EDUCATION

- **Sreepathy Institute of Management and Technology (SIMAT)** Dec 2021 - Mar 2025
Bachelor of Technology in Computer Science And Engineering Vavanoor, Palakkad
 - CGPA: 7.62/10
- **Govt. Higher Secondary School Chathanur** Jun 2019 - Apr 2021
Pre-University Education Chathanur, Palakkad
 - Grade: 83%

CERTIFICATIONS

- **IEEE XTREME 16.0** Oct 2022
 - Participated in 24 hrs coding competition and secured around 2000 rank globally.
- **NPTEL - PROBLEM SOLVING THROUGH PROGRAMMING IN C** Jan 2023 - Apr 2023
- **NPTEL - JOY OF COMPUTING USING PYTHON** Jan 2024 - Apr 2024
 - Certified in C and Python programming through a 12-week course by NPTEL, with successful completion of examinations.

ACHIEVEMENTS

- **InApp Innovate Hackathon 2025** Jan 2025
 - Achieved **First Place** in a 30-hour hackathon organized by InApp in collaboration with IEEE Kerala Young Professionals.
 - Developed an Early Epilepsy Prediction and Alerting System using EEG monitoring.
- **Tech Pulse Hackathon 2025** Feb 2025
 - **Winner ("Beyond Experience" Category)** of the 48-hour hackathon organized by ULTS, ULCCS at UL Cyber Park, Kozhikkod.
 - Recognized for excellence in UI/UX design and technology implementation for KisanX, an AI-driven smart farming app that provides an end-to-end solution for urban farmers.
- **OpenEnv Hackathon (Meta, PyTorch & Hugging Face)** Apr 2026
 - **Finalist** in India's Largest AI Hackathon, an exclusive Reinforcement Learning competition.
 - Built and trained custom Reinforcement Learning models focused on specific thematic environments.

PUBLICATIONS

- **Emergency Response Network Using Motion Sensors & Adaptive Location-Based Power Management** Jan 2025
 - Published in the proceedings of CEMC2024, organized by IDES and Grenze Scientific Society.
 - The paper introduces a mobile application (ERN) that leverages motion sensors, GPS tracking, and communication technologies to detect accidents automatically and alert nearby certified first responders, bridging the gap between incident occurrence and professional medical care.
